Making Sense of Levels

Sundance Newbridge stands behind its levels as good guidelines; however, teachers must use them as a point of reference and set their own level standards for their students.

† Guided Reading Levels (GRL 1996/2001) use the text characteristics described by Fountas and Pinnell in *Guided Reading* (Heinemann 1996) and *Guiding Readers and Writers, Grades 3–6* (Heinemann 2001). Guided Reading Levels (GRL 2012) use the text characteristics described by Fountas, Irene C. & Pinnell, Gay Su and Heinemann, Portsmouth, NH, 2012.

* Early Intervention Levels (EIL) are based on Reading Recovery[®], a registered trademark of the Ohio State University.

§ Developmental Reading Level Assessment (DRA), developed by Joetta Beaver, is a method of assessing and documenting achievement within a literature-based instructional program.

‡ The Lexile Framework[®] for Reading is a scientific approach to reading measurement, providing a common scale for matching reader ability and text difficulty. This allows educators and parents to quickly estimate expected reading comprehension and monitor progress.
